

SKYRATM
Professional Tableware

the NEW WAY
TO BUFFET

47 Years of Original Equipment Manufacturing for the finest tableware brands across the world. This decades-old heritage has given us the necessary understanding and capabilities of making the highest quality products.

SKYRA MINIBYTES COLLECTION

Skyra MiniBytes are fun items that bring joy to the food presentation. Inspired from iconic themes that we come across in our everyday lives and remember from our childhood, these wonderful amuse bouche servers are intelligent and playful. The MiniBytes collection is priced extremely well so as to be a valuable alternative to ceramic mini vessels.

SKYRA MELAMINE PLATTERS

Renew your starter service with easy to maintain melamine boards. The pass-around platters are 100% food safe and dishwasher safe.

SKYRA POD DISPLAY

The modern oval design of the Pod System makes this modular riser system extremely attractive.

It thrives in simplicity, yet overwhelms with functionality.

There are countless ways in which 3 piece system can be setup.

At the end of the event, it simply flat packs neatly into an amusingly small box

SKYRA DOBBELT BOWL COLLECTION

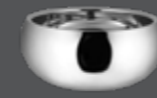

Dobbelt in Danish means 'double'. It accurately describes our minimalistic Scandinavian Double Wall Bowl Collection. The Double Wall allows for insulation when filled with hot food and prevents sweating in cold stations. It also helps keep food warmer for extended periods. The thick-walled, sleek designs are superbly finished and look beautiful in any setting.

PRODUCT CARE: ELECTROPLATED PRODUCTS

Skyra Professional Tableware has a 57 year old heritage in Electroplating finishes. It continues to lead the industry by consistently upgrading and aligning with the latest technological advancements. Skyra products are guaranteed to have the absolute highest quality in Stainless Steel based electroplating finishes.

Electroplating is as delicate as it is beautiful and should be handled with great care. Below are a few tips on how to take care of your new products.

PRODUCT CARE INSTRUCTIONS

- 1. Hand-wash the product with warm water only, after every use.*
- 2. Ensure to completely dry the product with a soft cloth after each wash.*
- 3. Cover the product in polythene (saran) wrap or cotton and store in a cool dark place. Do so only after it is completely dried.*
- 4. When the product is displaying signs of tarnish, rub with a metal polish compound and soft cloth. Silvo and Brasso are two commonly available polishing compound brands.*
- 5. For maximum shine, Buff the products with a high speed polishing machine. Using a soft 'Airflow mop Flannel Wheel' and standard Red Bar and Green Bar buffing polish compound, apply light pressure in 'color motion'. A sample of an appropriate Buff wheel can be requested from Skyra for reference.*

'DO NOT' INSTRUCTIONS

- 1. Do not allow the electroplated surface to be in direct contact with foods (foods with ingredients) that are acidic in nature such as Vinegar and Lime. Stainless Steel food pans and liners are provided in each product to hold these types of fares.*
- 2. Do not use the product over Direct Heat/ Flame. In the case of Chafing Dishes, ensure that water is always filled in the Water Pan before placing the Chafing Fuel underneath it.*
- 3. Electroplated products are not developed for cooking. They should only be used for Front house serving.*
- 4. Do not scrub the Electroplated surface with an abrasive sponge.*
- 5. Do not use industrial detergent on the Electroplated surfaces or put into a dishwasher.*
- 6. Do not leave the product wet as permanent water marks may stain the surface.*
- 7. Do not use Cotton Wheels with grit specification to buff the electroplated surface. If in doubt, cross-check with your Skyra relationship manager.*

ELECTROPLATING OVERVIEW

Electroplating is an electro-chemical process through which a thin layer (up to 10 microns) of Gold, Silver, Copper, Brass, Nickel, Chrome and other metals are applied onto a Stainless Steel surface.

Most of these metals are known to react to moist air and oxidize over a period of time. The black film that is created on the topmost layer of the metal as a result of oxidization is known as 'Tarnishing', and is not a manufacturing defect. Tarnishing is a natural process that can be removed with the help of rubbing polish compounds, either manually or with a polishing machine.

Over a period of time, depending upon the level of usage and re-polishing, the layers of electroplating will consistently be grazed until the Stainless Steel base material is visible. At this stage, Skyra offers re-electroplating services to restore the finish to its original condition.

Please do not hesitate to contact your relationship manager for any further understanding or troubleshooting with your Skyra items. We hope you have a great product experience.
