We care about your future

Our approach to Sustainable Development was formalised in 2004, when we committed to the United Nations Global Compact. Ever since then, sustainable development has been a central part of our strategic policy. The E.CF Group sees sustainable development as a key factor for innovation, competitiveness, differentiation and customer satisfaction.

Five major goals

Provide more green products

On-going development of our "green" products, offer of ecological alternatives (e.g.: consumables, hygiene products)

Maintain sustainable partnerships

Implementation of an ethics charter signed by our suppliers since 2007

Control our environmental impact

Reduce our ecological footprint: reduce plastics, paper printing (going paperless), our energy costs (installing LEDs), our waste, etc.

Promote our challenges

Support / donations to charities and NGOs (e.g.: Les Restos du Cœur, Fondation Nicolas Hulot, Cuisine Mode d'Emploi(s), etc.)

Improve employment relations

Conduct Quality of Working Life surveys

The E.CF Group has just renewed its ISO 9001 certification, affirming the Group's commitment to providing the highest quality products and services to all of our customers.

Since the 1920s Falcon Enamelware has been an icon of British home life. But as well as timeless elegance, Falcon Enamelware has enduring strength. Enamelware is porcelian fused onto heavy-gauge steel, giving it many admirable qualities - durability, smoothness and chemical resistance. It can assume brilliant long-lasting colors, and cannot burn. If you drop it, it may chip but it won't break. Dishwasher-safe and oven-safe up to 270°C, it can also be used on gas and electric hobs.

OPEN'UP

Open Up is a range of glasses with a contemporary and revolutionary design, which provides wine-drinkers with an incomparable tasting experience. Suitable for tasting all types of young wine («young» wine can be defined as 1-3 years for white wine and 1-5 years for red). The different models in the Open Up range cater for the majority of wine varieties and types produced worldwide. The shape of the Open Up glasses creates an actual "carafe effect" because the wine is oxygenated faster. The convex part (1) builds up aromas, which are then concentrated in the concave part (2)

OENOLOGUE EXPERT

Sophisticated lines... the secret of stylishly set tables. Since it was created in 1991 by oenologist Dany Rolland, this glass has proven a tremendous success with professionals: its unique, harmoniously curved shape respects even the most delicate wines. Initially made of crystal, now thanks to the new material Kwarx® it possesses matchless resistance, brilliance and transparency. Even though ultra thin, it is without doubt one of the toughest glasses on the market. Its sophisticated lines make it the secret of stylishly set tables.

FIBERGLASS® FLUTED TRAYS FOR FROZEN DOUGHAMATS

FLEXIBLE FLUTED TRAYS OF FIBERGLASS AND SILICONE ARE ESPECIALLY EFFECTIVE FOR PROVING AND BAKING FROZEN DOUGH. THEIR PARTICULAR STRUCTURE PREVENTS THE DOUGH FROM STICKING TO THE FIBERS DURING DEFREEZING AND PROVING . THE FLUTES NATURALLY REMAIN STABLE ON THE FRAMES, WITHOUT THE NEED TO BE STAPLED ONTO THEM. THE TRAYS ARE LIGHT TO HANDLE. THE FLUTES OF THE TRAYS WILL NOT LOSE THEIR SHAPE OVER TIME, ALLOWING YOU TO ALWAYS BAKE PERFECTLY ROUNDED BAGUETTES. SHOULD THE FLUTES WEAR OUT, YOU CAN JUST REPLACE THIS ELEMENT.
